PC-4000 The PC-4000 is a line of pocket computers produced by Lotus Development Corporation in collaboration with Motorola. It was the first line of products sold by Lotus under its Symbol Systems umbrella. Introduction The PC-4000 was introduced in 1981 as a low-end, cost-effective computer to compete with the Apple II and IBM PC XT. The original price was \$1,299, and it was released by 1986. The name was an anagram of the word "Forty", referring to its release in the fourth year of the PC, as a successor to the PC-2. At its introduction, the PC-4000 used a 40×48 character font display. It shipped with either a 4.77 MHz Z80 processor with a 6.00 MHz 8-bit bus or a 4.55 MHz 80286 with a bus speed of 8.33 MHz. Users could choose from either a 2, 4 or 8 MB hard drive. A 10-foot UART was provided to allow the PC-4000 to connect to external peripherals, including printers and other terminals. Models PC-4000 (Z80, 6 MHz, 4.77 MHz internal clock) PC-4000 (80286, 8 MHz, 8.33 MHz internal clock) PC-4000 (Z80, 6 MHz, 4.77 MHz internal clock)

Reception PC Magazine in its January 1982 issue said of the first PC-4000: "If you're looking for an affordable family computer, you might want to look toward the Lotus line. Though a couple of their earlier machines have been on the market for a while, this is the first family member from their new Symbol Systems line." The magazine went on to name it the PC of the Year in its December 1982 issue. References External links Lotus-Symbol Official PC-4000 page Comparison of PC-4000 models Category:Lot 5b5f913d15
